

OUR NEW ROSIN FOR RAIN OR SHINE

Thomastik-Infeld Rosin:
The one-fits-all rosin for many, many climatic conditions.

How our Thomastik-Infeld Rosin lights up faces around the world

Our new premium Thomastik-Infeld Rosins for violin, viola, and cello strings help you get the most out of your performance, no matter if you play in Rio de Janeiro, Stockholm, or Vienna.

We have sourced resins and waxes from 5 continents and blended them specifically for each of the 3 instruments. So by using this rosin, you can get even more tonal variety from our Thomastik-Infeld strings. The rosin supports focus, attack, and brilliance, helps improve the strings' resonance and makes clear articulation easier. It provides a secure grip, but at the same time maintains a balance of grip and smoothness, which helps to activate the center core of the sound. On top of that, it helps to project warmth and color to the very last row when you perform. All 3 rosins are designed to work in different climatic conditions and come with a silicone cap to protect them.

Thomastik-Infeld Rosin is available for violin (N^o-TIVO01) including a booster, viola (N^o-TIVA01), cello (N^o-TIVC01) and soon for bass. We think you should try it on your next trip – or in the practice room.
